# Overview

Detailed information about the linked file types is available in a searchable database of over 10,000 file extensions at File.info.

The search box is located at the top of each page and can be used to check up software products and file extensions. Additionally, you can search the entire website using the Advanced Search function. There is a good possibility that you will find the answer to your file-related questions in the Help Center.

## How it works?

- Visit Website.
- Search any extension you want to check.
- You can see all the details about an extension.
- You can check accurate and up-to-date information about various file extensions and their corresponding uses.

# Core Objectives

- Provide accurate and up-to-date information about various file extensions and their corresponding uses.
- Allow users to search for specific file extensions and quickly access information about them.
- Create a user-friendly interface that is easy to navigate and understand.

## Free

The website is accessible to all users without any cost.

## Search

Search for file extensions & view information quickly.

## Information

Provides information on file extensions and their uses.

## User-friendly

Easy to navigate and understand for all users

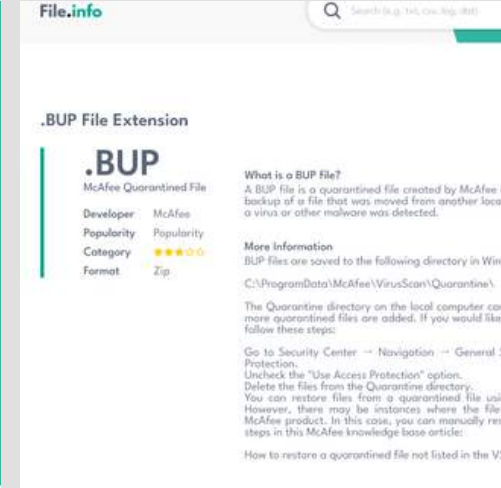

onFile.info

Search over 10,000 software products and file extensions.

Search (e.g. ttf, csv, log, dot)

Drag and drop or upload a file to view file details.

### .BUP File Extension

**.BUP**  
McAfee Quarantined File

Developer: McAfee  
Popularity: Popularity  
Category: ★★★★☆  
Format: Zip

**What is a BUP File?**  
A BUP file is a quarantined file created by McAfee Backup of a file that was moved from another location because a virus or other malware was detected.

**More Information**  
BUP files are saved to the following directory in Windows:  
C:\ProgramData\McAfee\VirusScan\Quarantine\

The Quarantine directory on the local computer can contain more quarantined files are added. If you would like to remove these files, follow these steps:

Go to Security Center → Navigation → General → Security → Protection.  
Uncheck the "Use Access Protection" option.  
Delete the files from the Quarantine directory.  
You can restore files from a quarantined file using the McAfee product. However, there may be instances where the file is not listed in this McAfee knowledge base article. In this case, you can manually restore files in this McAfee knowledge base article:  
How to restore a quarantined file not listed in the VirusScan Quarantine
