Automatic **Voice Call Recorder**

Core Objectives:

An easy to use AutomaticVoice Call Recorder App for mobile users call recorder app that records all calls as chosen by user in high quality with mobilized usability and having sharing options for related social media. The objective is to fill the need for a free service with unlimited storage space for android users.

Core Features:

Record and transcribe any calls on your Smartphone -both outgoing & incoming calls for your android devices.

Product Features and dependencies:

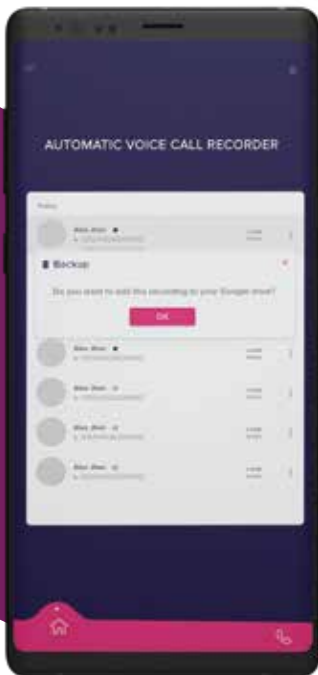

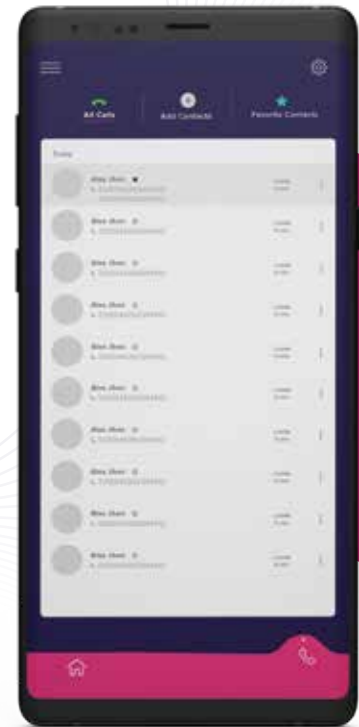

■ For Auto Voice Call Recording.

we have to make some Recording services in which we use (MediaRecorder, TelephonyManager, AudioManager and CallObject for both incoming and outgoing calls) and we have to add numbers to the special list, set the "Default record" to "specialist". Then we will be able to only record incoming and outgoing calls between these numbers. Alert Box is shown to the user before calling or picking up the calls from unknown numbers to keep them in special list or not.

■ To List all the Recordings.

we have to make listview or recyclerview and make options for playing those recordings, share and delete them as well.

■ For Backup or Upload Recordings on Google Drive .

we have to use Google Drive Authentication dependency for authenticating the user's google account first and after that we use Google's Drive , Client and Gson Api's for Backup/uploading the Recordings on Google Drive.

Product Features :

FREE

□ **Completely Free.**
